

## Polynomials and Geometry!

1. Determine an expression for the perimeter of the following shapes then simplify.

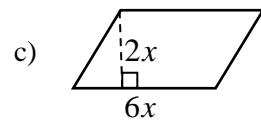

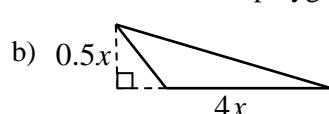

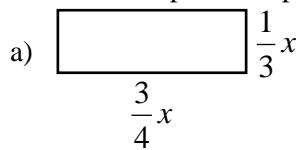

*Hint –  
perimeter is the  
SUM of all of  
the sides*

2. Find an expression for the missing side length given the Perimeter, then simplify.

b)  $P = 6x + 1$

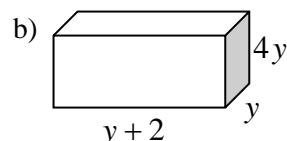

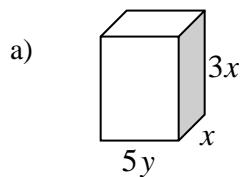

3. Find a simplified expression for the area of each polygon.

$A = b \times h$

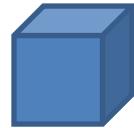

$A = b \times h \div 2$   
for a triangle

4. Determine a simplified expression for the volume. (Volume = length x width x height)

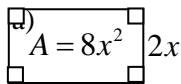

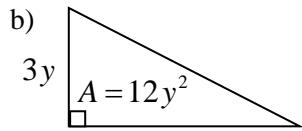

## Polynomials and Geometry!

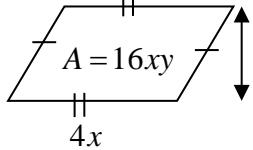

- c) Find the surface area of the cube with side lengths of  $(3x)$

5. Given the area of each polygon find the missing dimension.

a)   $A = 8x^2$

b)   $A = 12y^2$

c)   $A = 16xy$

6. Determine the width of rectangle with  $\text{Area} = 10x^2 - 15x$  and  $\text{length} = 5x$ .

7. Determine the height of a triangle if the  $\text{Area} = 12x^3 - 6x$  and the  $\text{base} = 4x$ .

8. The Perimeter of a square is  $8x^2 + 4x - 16$  meters. Find the length of each side.
