

Rationals on number lines

When looking at a fraction like $\frac{2}{5}$, it means that each whole is divided into FIVE parts, and the two indicates the rational is located 2 spaces to the right of zero.

Identify the fraction represented by the stars:

e)

f)

Place the following rational numbers on the given number line. Clearly identify the closest integers (above and below) the number.

$\frac{2}{3}, -\frac{1}{3}$

$-\frac{4}{5}, \frac{1}{5}, 2\frac{3}{5}$

$\frac{3}{7}, -\frac{10}{7}, -\frac{1}{7}$

$\frac{3}{8}, -\frac{1}{2}, \frac{3}{4}$

$0.6, 1.2, -0.3$
