## Unit Conversion Worksheet

Introductory Unit; Lesson 3
Part One: Change the following numbers to the appropriate units of measurement.

1) 78.36 liters $=$ $\qquad$ milliliters
2) 12.3 meters $=$ $\qquad$ centimeters
3) 76.3 millimeters $=$ $\qquad$ centimeters
4) 143.2 meters $=$ $\qquad$ millimeters
5) 312 milligrams $=$ $\qquad$ grams
6) 15.3 milliliters $=$ $\qquad$ liters
7) 7.5 grams $=$ $\qquad$ milligrams
8) $9.4 \mathrm{~nm}=$ $\qquad$ m
9) $6.32 \mu \mathrm{~m}=$ $\qquad$ km
10) $16 \mathrm{~s}=$ $\qquad$ ks
11) 750000 mL $\qquad$ L
12) 457 km $\qquad$ mm

Part Two: Convert the following via Dimensional Analysis. Show all work.
13) $21 \mathrm{~km} / \mathrm{h}=$ $\qquad$ $\mathrm{m} / \mathrm{s}$
14) $56 \mathrm{~m} / \mathrm{s}=$ $\qquad$ km/h
15) $12 \mathrm{~km} / \mathrm{h}=$ $\qquad$ $\mathrm{m} / \mathrm{s}$
16) $445 \mathrm{~m} / \mathrm{h}=$ $\qquad$ $\mathrm{m} / \mathrm{s}$
17) $87 \mathrm{~km} / \mathrm{day}=$ $\qquad$ km/h
18) $91 \mathrm{~km} / \mathrm{h}=$ $\qquad$ $\mathrm{m} / \mathrm{s}$

Part Three: Complete the following multi-step dimensional analysis conversions. Be sure to include all work.
19) How many inches are there in a football field ( 100 yards)? ( 1 yard $=3$ feet; 1 foot $=12$ inches)
20) In England, a person's weight is commonly given in stones. One English stone is equal to 14 lbs . If an English friend tells you he weighs eleven stones, what is his weight in:
a. Pounds?
b. Kilograms? $(1 \mathrm{~kg}=2.20 \mathrm{lb})$
