

David was living with his family in a small community.

"I was a normal little boy, growing up in a normal way, taking the ways of the world about me for granted." (Wyndham, 1)

He had a mutation that he had to hide because it was against the law in their society.

"People in our district had a very sharp eye for the odd, or the unusual, so that even my left-handedness caused slight disapproval." (Wyndham 1).

David had a friend named Sophie that had a mutation, but it was different than David's.

"I didn't even notice then that it had more than the usual number of toes." (Wyndham, 3).

Sophie wasn't allowed to go out a lot and she can't learn anything because she doesn't go to school.

"Sophie couldn't go to school..." (Wyndham, 14)

David decided that it would be a good idea to teach Sophie what he has learned.

"...her parents, though they taught her to read and write, did not have any books, so that it wasn't much good to her." (Wyndham, 14).

After David was helping Sophie he turned in to the Super Solver! David is able to help anyone or solve any problem in any situation.

"Just leave it to David..." (Wyndham, 44)

David had another mission when he was given a signal from his sister Petra that she was in trouble.

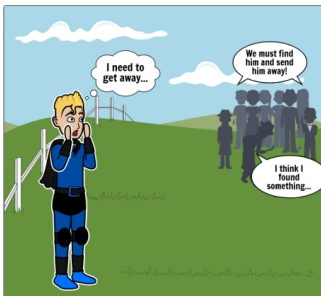

"Then there was pain, a demand pulling like a fish-hook embedded in my mind. There was, in the surprise of the first few moments at any rate, no question whether or not I should go; I was obeying it, in a daze." (Wyndham, 33).

Petra was stuck in the river and was fighting for her life but David was able to help her.

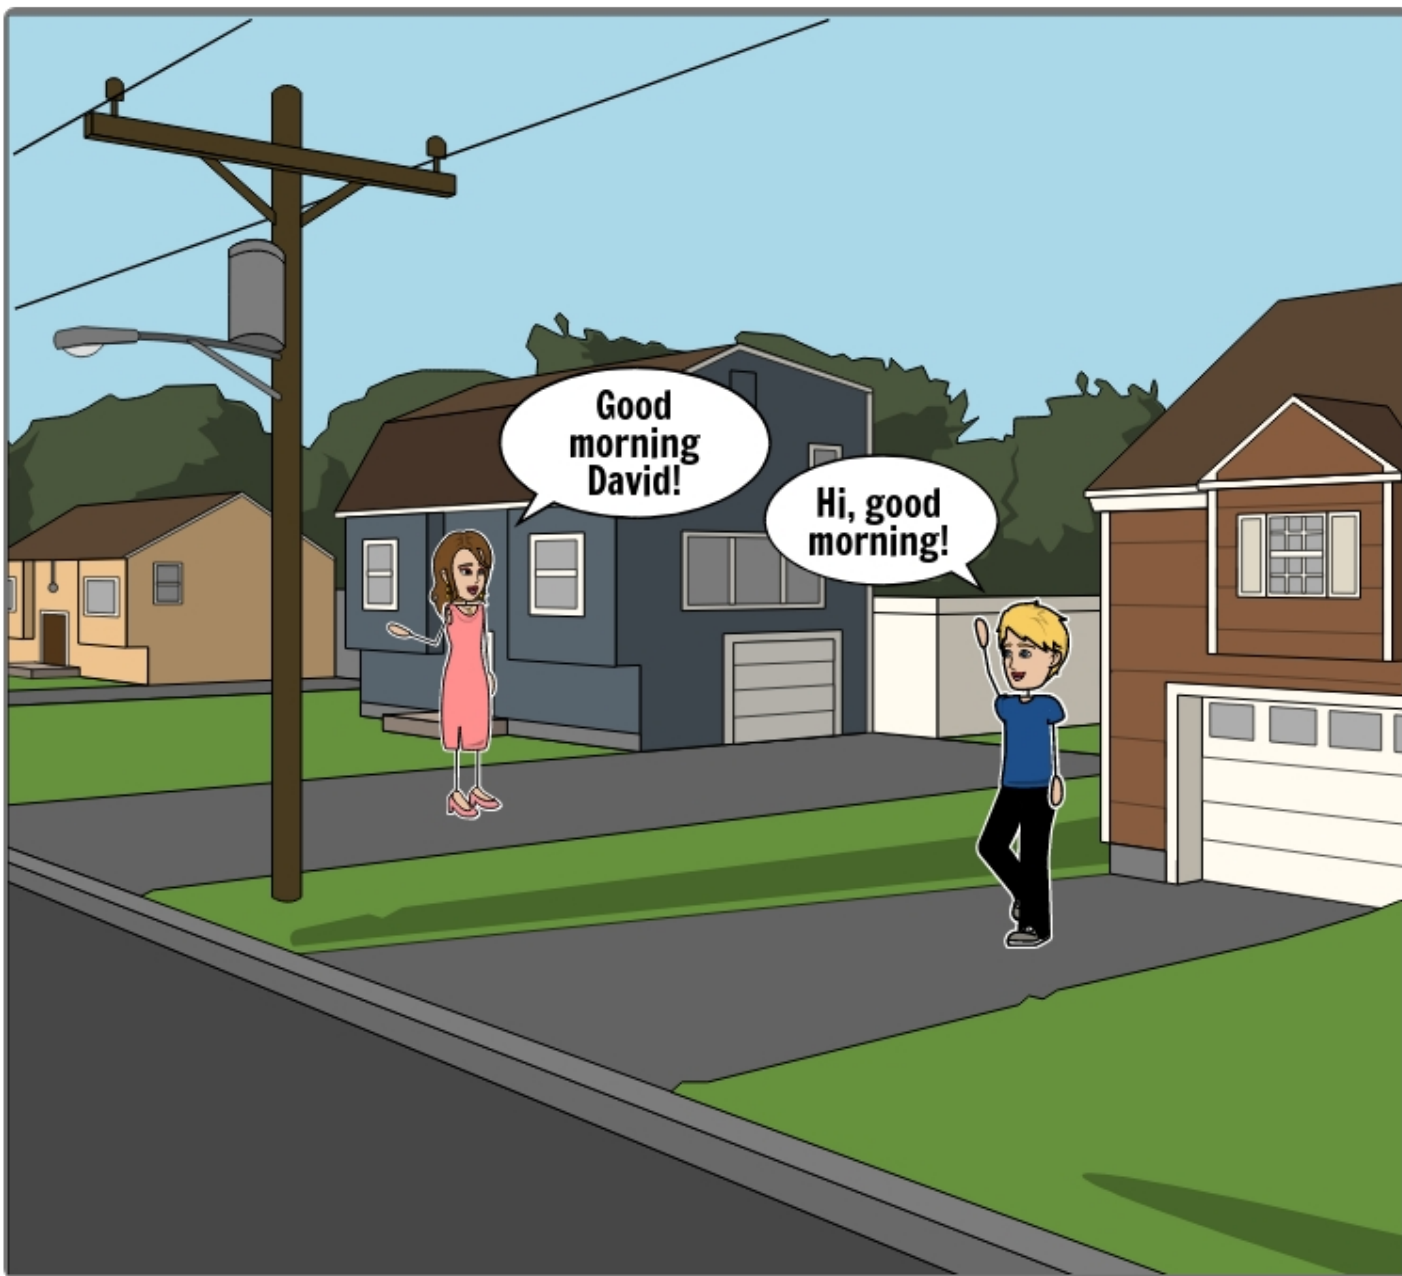

"I carried my little sister ashore, and laid her on the grass. She was exhausted, and only semi-conscious, but there did not seem to be anything seriously wrong with her." (Wyndham, 33).

After he has been hiding his ability for so long, it has been discovered by others and David has another problem to solve.

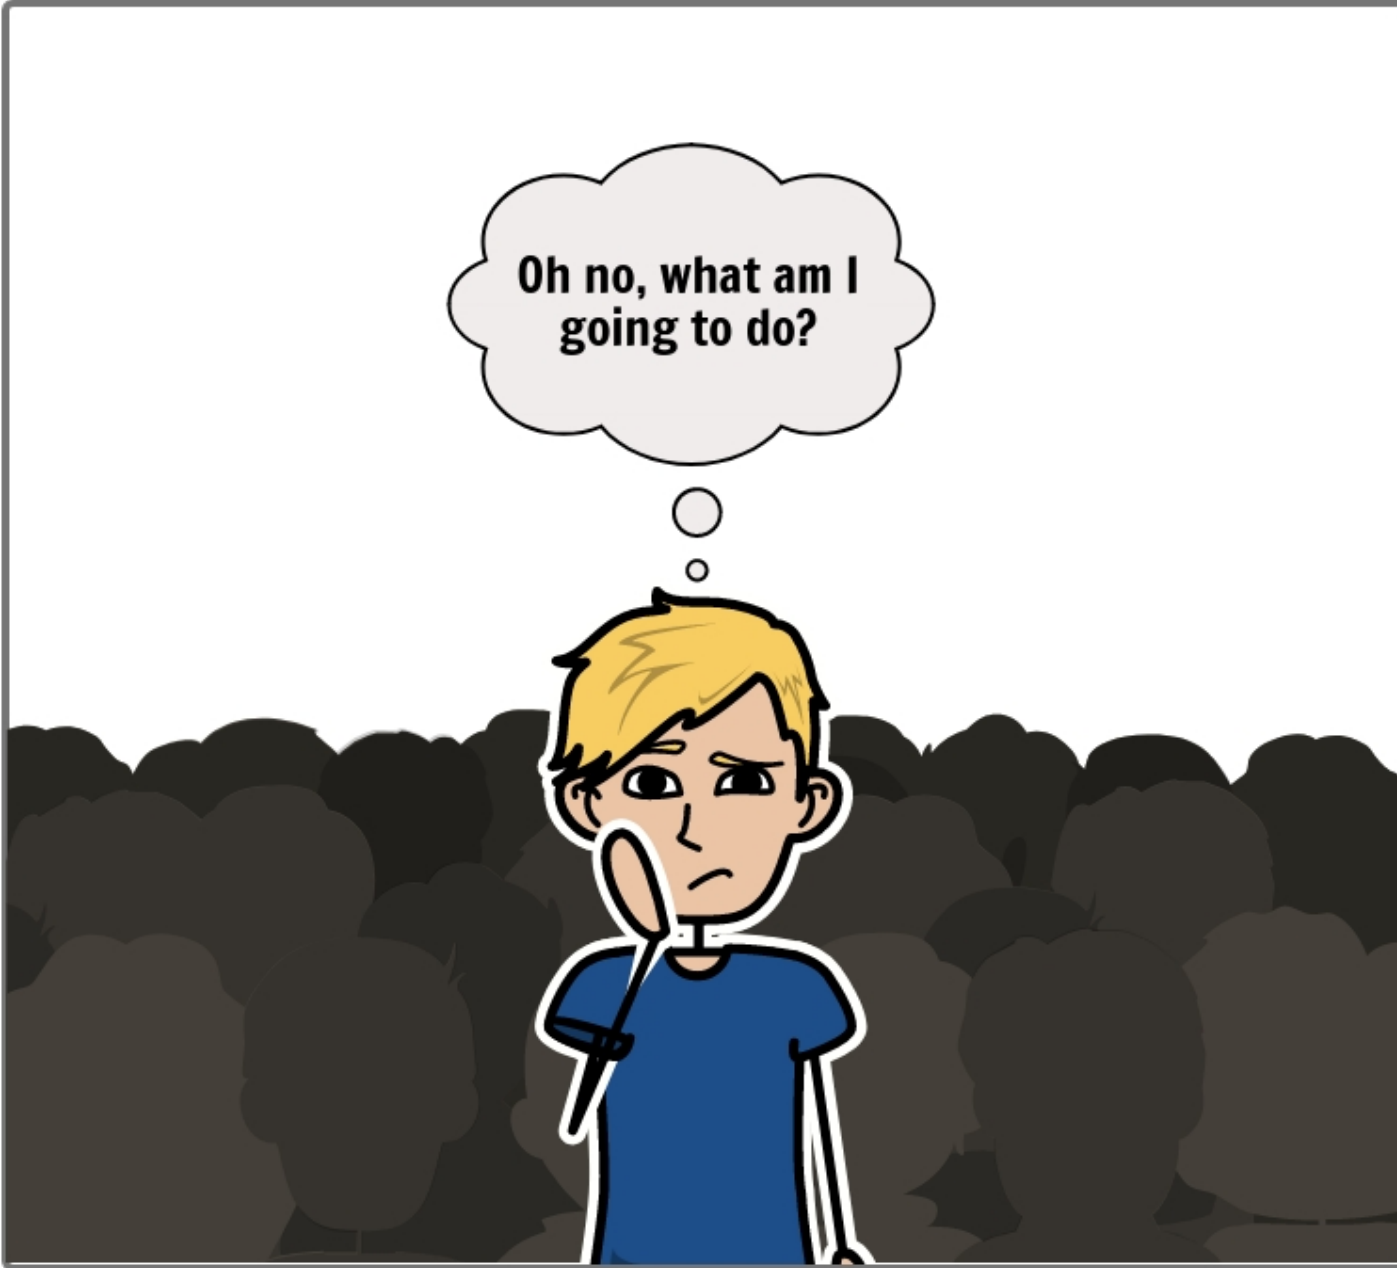

"One of us has been found..." (Wyndham, 41)
