

Clouds

Cumulus

Photo taken at: 3:47 pm

This photo was taken outside my house before I went on my way to the ferry terminal.

These clouds are Cumulus due to the clouds looking like cotton balls, as well as their flat bottoms and defined edges.

Stratus

Photo taken at : 8:38 am

This photo was taken in Nanaimo when I was about to enter the gym to play volleyball.

These clouds are stratus because it was grey and the clouds were very low covering the sky.

Cirrus

Photo taken at: 3:48 pm

I took this photo when I was walking
around the water in downtown
Nanaimo

I believe these clouds are cirrus
because there are thin and wispy and
there was none to little clouds
