

Core Competencies Self-Assessment

Name: Daejung Choi

Date: April 14th 2022

How does the artifact you selected demonstrate strengths & growth in the communication competency?

In what ways might you further develop your communication competency?

How does the artifact you selected demonstrate strengths & growth in the thinking competencies?

In what ways might you further develop your thinking competencies?

How does the artifact you selected demonstrate strengths & growth in the personal & social competencies?

In what ways might you further develop your personal & social competencies?

Self-Reflection

Describe how the artifact you selected shows your strengths & growth in specific core competencies. The prompt questions on the left - or other self-assessment activities you may have done - may guide your reflection process.

For one of our recent assignments in Drafting 11, we were assigned to create a plane with a partner or on our own in class. Creating the plane took multiple steps, including different sketches and research involved in the process. I would definitely say that this assignment had demonstrated strengths and growth in the thinking competencies more than any other competency, mainly because creating/re-designing a plane from scratch involved a lot of thinking and steps. I think that the re-modeling of the plane demonstrated my thinking competencies due to the fact that I was able to show the design process within the assignment; with the assignment came lots of thinking, especially when we had encountered some sort of struggle throughout the assignment. I think that overall although we weren't able to present a 3D printed model we were able to learn a lot using Inventor through creating the model, and with different skills within the program we were able to pick up a lot of skills. In order to further develop my thinking competencies in the future for an assignment pertinent to this one that I could have definitely had more sketches in order to demonstrate either the different views of the plane or something else. Sketches is a big thing in projects that involve the design process which is probably why I would say I would need more sketches; other than that, I think that I had a sufficient amount of research within the projet (lots of time doing research on past models and attempts at creating a plane), and apart from putting together all of the parts i think that we did a pretty good job at completing this assignment. If there's something that I had learned from this assignment, is that creating a prototype of anything takes a lot more steps than said; research, sketches, drawings, the actual process of creating an object and more are all required to create a prototype.

Publish Your Self Assessment

You will now attach and/or embed your self-assessment to the bottom of the blog post with the artifact you have chosen. You may choose to make this post private or public. After placing your artifact on a blog post, follow the instructions below.

1. Categories - Self-Assessment
2. Tags - Now tag your post using the tag that corresponds to the competency that you have written about. You can choose more than one. Please use lower case letters and be exact.
 - #creativethinkingcc
 - #communicationcc
 - #criticalthinkingcc
 - #socialresponsibilitycc
 - #personalidentitycc
 - #personalawarenesscc
3. Use the [Add Document](#) button located at the top of your post page and embed your self-assessment at the bottom of your blog post.
4. Publish
