

Core Competencies Self-Assessment

Name: Daejung Choi

Date: January 16th, 2023

How does the artifact you selected demonstrate strengths & growth in the communication competency?

In what ways might you further develop your communication competency?

How does the artifact you selected demonstrate strengths & growth in the thinking competencies?

In what ways might you further develop your thinking competencies?

How does the artifact you selected demonstrate strengths & growth in the personal & social competencies?

In what ways might you further develop your personal & social competencies?

Self-Reflection

Describe how the artifact you selected shows your strengths & growth in specific core competencies. The prompt questions on the left - or other self-assessment activities you may have done - may guide your reflection process.

Pre-Calculus 12 was a course that was a big step-up from Pre-Calculus 11, in the sense that the topics that we had covered were a lot more challenging and the course-load in general was more in comparison to the year before. Pre-Calculus 12 had enabled me to grow in all 3 competencies this year but the one that it helped me grow the most was in the thinking competencies; compared to all of the previous years, academically I feel as though I wasn't able to keep up with the class which I feel was due to my inefficient studying strategies as well as time management. This resulted in a drop in my grades throughout the several tests that I took, which overall was extremely difficult as I had troubles finding a studying routine that achieved consistent success throughout the remainder of the course. Pre-Calculus 12 had enabled me to grow in the thinking competencies also because of the units that we went through during the year; as they became more challenging (the most challenging being trigonometry identities) it made me think more and made me try a different variety of ways in order to find the correct solutions and techniques in order for my learning to be effective for not only that unit but for future units as well. To prepare for my final exam, I intend on using similar strategies that I used for my first trigonometry test for (in which I got my highest mark for) and combining it with different strategies that my friends had used in order to achieve success within their tests as well. Although I'm not 100% confident going into the finals, the best thing that I can do for now is to keep consistent at studying and hope that I'll do well when the finals comes around. Studying for the finals will require a lot more effort compared to all of the other tests as it is a cumulative assessment of everything and so I plan on studying a lot more compared to my other tests. Also, because this is the first time in high school that I'm having a finals in Pre-Calculus I expect it to be more challenging compared to everything else I've done.

Publish Your Self Assessment

You will now attach and/or embed your self-assessment to the bottom of the blog post with the artifact you have chosen. You may choose to make this post private or public. After placing your artifact on a blog post, follow the instructions below.

- Categories - Self-Assessment
- Tags - Now tag your post using the tag that corresponds to the competency that you have written about. You can choose more than one. Please use lower case letters and be exact.
