

Graphing Stories Group Task

Your Name: Jada Betts

Group Member 1: Cara

Group Member 2: _____

Create a relationship between two variable and write your relation in words here:

How many leaves are in frame over the course of 15 seconds

For your relation identify:

The independent variable Time (seconds)

The dependent Variable # of leaves

The input Time

The output # of leaves

The domain values $0 \leq x \leq 15$

The range values 0, 1, 2, 3, 4, 5

x – intercept 0

y – intercept 0

**use formal math notation for your domain and range values. You can use inequalities or interval notation.*

Create a 15 second graphing story that depicts your relation. Post your video to your Edublog title and tag it #graphingstory2020. Record your solution on the graph below. Label your axis with units and include a graph title. Post this page to your Edublog with your video. Each group needs 1 video and 1 solution per group member.
