By: Liam Campbell   My Digital Footprint

1) How might your digital footprint affect your future opportunities?

 If you have some things that you've done that are bad, if you go to apply for a job, and they see what you have posted online, they could decide to not give you the job for that reason.

but if the things you've posted aren't bad, it wont affect your future badly.

2) Strategies you can use to keep your digital footprint appropriate and safe:

Well, don't post everything you do, because somethings that you think are fine, can ruin your chance of getting a good job.

NEGATIVITY Be respectful to others and keep things to yourself.

This video is private.
Sorry about that.

Keep things online private so people don't use things you've posted against you.

3) What information did you learn and would pass on to other students?

Being that I don't use much social media... I would tell them not to post EVERYTHING you do because it's probably not safe for your future, and people can get that information and that can make it difficult for you to get a job.
