Our french-speaking exercises helped me a lot with understanding and speaking french in a more formal and precise way. I didn't realize before, but it's hard to talk for two straight minutes without forgetting a word or mispronouncing something else. The listening and speaking exercises helped me out a lot with this aspect of communicating.

Creative thinking can now be easier from this course because now I can think more clearly in french and communicate this to others, say if I had a creative-centered french project. Making ideas will be easier for both me, and any other groupmates I could potentially be working with.

Critical thinking is also important part in any project, having the ability to solve problems and make plans in french is going to help me a lot for any future french projects.

How does the artifact you selected demonstrate strengths & growth in the personal & social competencies?

In what ways might you further develop your personal & social competencies?

I don't plan to travel, for some worldwide lockdown reasons, but if I ever find myself in a french speaking area, I will have less trouble than I would have without these exercises. The more I train my mind to better speak, understand and read french, there soon won't be any problem at all.

I feel better about myself knowing that I can speak a second language even better and faster before, my mind is stronger than ever. I like having other ways of communicating and thinking and reading.
