

Science App Review

1. What is this app teaching you?

A. How the human body is repaired.

2. How is this app teaching you?

A. It is teaching all the ways a surgeon repairs the body.

3. How will this app help you in science?

A. It will teach me about human anatomy.

4. Is this app easy to understand?

A. Yes it is. It shows you steps, and helps you to complete a surgery.

5. Could this app create opportunities in the future?

A. Yes it can help you understand the learning of the human body, which can help you with your health, or can create a job for you.

6. How does this app show you the the procedures of a surgery?

A. It lets you actually do a surgery step by step with the tap of your finger.

7. How can this app help you in life?

A. It can give you a better understanding about human anatomy.

8. Would you make any changes to this app?

A. No I wouldn't make any changes because it explains everything really well, and it makes it seem so real.

The app I used was called "Touch Surgery", it is an app where it teaches you how to perform surgery. Each surgery on the app is created by a real surgeon.

What I learned on this app, was how the human body was repaired, and how hard it must be to be a surgeon.
