Self-Reflection

Describe how the artifact you selected shows your strengths & growth in specific core competencies. The prompt questions on the left - or other self-assessment activities you may have done - may guide your reflection process.

For this project I had to use creative thinking, I had to generate ideas for a game, then develop the ideas so they could become a game. I think I made a good game, that has a good level of challenge for the individual playing.

The complete project is a game where you have to avoid red balls and try to get the blue ones, I had to solve a lot of problems when the code would not play out the way I wanted it to.

The final product is a game, that works how I want, and I can be happy with the result.
