**Self-Reflection**

Describe how the artifact you selected shows your strengths & growth in specific core competencies. The prompt questions on the left - or other self-assessment activities you may have done - may guide your reflection process.

For this project I used creative thinking and critical thinking. Since I had no background of using the Blender Software it took some time to learn how to do everything I needed to. I used creative thinking to generate ideas on what to do (even though I followed a tutorial on YouTube) I needed to change certain things to make it work for the words I was using. I used critical thinking when there was a problem or something was not clear on the video. Also, to check the work I did to make sure it was up to my standards.

Now after this project I have a better understanding of how to use blender software, I have also gotten better at re-tracing my steps if something is not working.

& growth in the personal &
social competencies?

**In what ways might you further
develop your personal & social
competencies?**
