

**Exemplar #2 – Score: 4**

- ✓ The work demonstrates a proficient understanding of the situation.
  - determines the total investment over 5 years for each partner
  - determines that each partner should be allocated back their individual investments and then half of what remains from the sale price
- ✓ The strategy is effective and comprehensive.
  - from the sale price, each partner receives back their total investment over 5 years and then half of what remains
- ✓ The logic references all aspects of the problem.
  - each partner's investment is considered when determining the allocation of sale price
- ✓ The reasoning is clear, detailed, and organized.
  - the calculations for investment are included and correct
  - the allocation of sale price is determined and is reasonable
