The prompt questions on the left - or other self-assessment activities you may have done - may guide your reflection process. My DNA Structure and Replication blog post demonstrates strengths and growth in the communication competency because I digitally communicated how DNA is structured and how it replicates to an uninformed audience. I might further develop my communication competency by doing more blog posts and presentations. The blog post also demonstrates strength and growth in the thinking competencies because I modeled DNA structure and replication in a creative way. I also used critical thinking to explain how the model was inaccurate and how it could be improved to better model DNA structure and replication. I might further develop my thinking competencies by modeling more structures and processes in Anatomy and Physiology.
