

Defⁿs

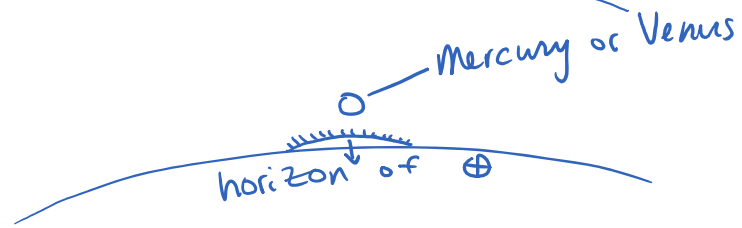

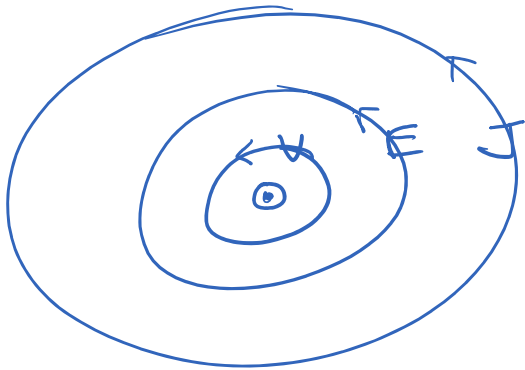

meteoroids - rock fragments in space

meteors - a streak of light from rock fragments burning up from friction as they fall through the atmosphere

meteorites - rock fragments that manage to hit the surface of \oplus (or other object)

Morning + Evening "Stars"

Mercury + Venus can only be seen in the morning or evening because they are closer to the sun than \oplus . We see them just before sunrise or just after sunset, depending where they are in orbit.
