

Weather Observation Lab

October 22, 2015 1:59 PM

https://weather.gc.ca/city/pages/bc-35_metric_e.html

Table should include:

Date/Time	March 8 11:00			
Temp/Dew Pt	7.9°C/4.7°C			
Air P/Tendency	101.4 kPa falling			
Wind direction/speed	from ESE 17 km/hr			
Humidity %	80%			
Sky condition	mostly cloudy			
Cloud type - omit %	strato cumulus			
Visibility	24 km			
Other observations				

- Record data until near the end of the atmosphere unit.
- Then write a paragraph describing any trends you notice between the observations and weather over the next days. What is most useful in predicting the weather?
