

Activity: Geysers, Hot Springs, Fumaroles

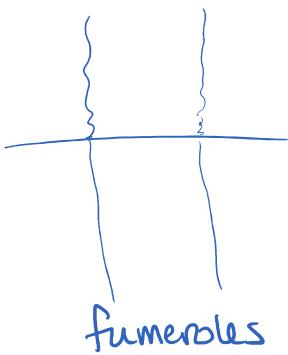

Draw diagram from pg 159 (on Blog)

hot
spring

geyser

fumaroles

Magma heats groundwater which finds its way to the \oplus 's surface as:

- geysers - constricted tube, pressure builds, hot water erupts.
- hot springs - wide tube, no pressure, forms pools of hot water
- fumaroles - steam escaping from tiny fissures in the ground.

Yellowstone National Park!
