

① Underground - used to mine minerals in a mountain or too deep underground → tunnels...

- dangers - poisonous gases - canary - ventilate and use electronic sensors to detect
- tunnels could collapse
- could fill with water - pump out

② Surface - used when mineral is at or near the surface

a) placer - gold panning (Yukon Dan)

b) open pit - used when minerals/coal seams are twisted

c) strip - used to mine coal when it is in a flat layer (mined in strips)

d) quarrying - large blocks of granite or limestone are wedged loose and used for buildings

ex BC's parliament is made of granite blocks
Winnipeg's " " " " limestone (w fossils)
