

Test Overview

Will be collecting grey booklets as well

Test is out of 40 marks:

10 matching

20 multiple choice

10 marks written

Topics: Weathering/Erosion, Soil, Streams, Glaciers, Wind/Waves, impacts on W&E by climate or humans

Written:

1. W&E - definitions, difference, examples of each
2. Soil horizons - diagram given, label two of the layers
3. Draw a meandering stream, point to where shallow part is
4. Recessional moraine formation
5. How can global warming accelerate W&E?

To review: do questions #70 to 85 on purple Bonus page (see blog for extra copies if you have lost the one handed out to you.)
